

Challenge Name: deterrence-01 - 100 (OSINT)

Step 1: Identifying the Acronym

The challenge refers to *Permissive Action Links*, Cold War–era security devices installed on nuclear weapons to prevent unauthorized use.

The acronym is: **PALs**

Step 2: The Memoir Reference

The hint pointed us toward profiles of **Pervez Musharraf**, former President of Pakistan. His official biography and Wikipedia page mention his memoir:

"In the Line of Fire: A Memoir", published in **2006**.

So, the exposé being referenced connects PALs with discussions of nuclear command & control around Pakistan in 2006–2007.

Step 3: Flag Format

The challenge expected a simplified combination of:

- The acronym (**PALs**)
- The publication year of the memoir (**2006**)

Final

By connecting nuclear security terminology (**PALs**) with Musharraf's 2006 memoir, we solved the challenge.

Flag: `SPL{PALs_2006}`
